

# Evolution Vocabulary

Vocabulary Term	Definition (in your own words)
adaptation	
allele	
allelic frequency	
analogous structures	
behavioural isolation	
complementary base pairing	
convergent evolution	
divergent evolution	
deoxyribonucleic acid	
double helix	
evolutionary change	
fitness	
gene flow	

Vocabulary Term	Definition (in your own words)
gene pool	
genetic drift	
geographic isolation	
gradual change model	
homologous structures	
mutation	
natural selection	
nitrogenous base	
non-random mating	
population	
punctuated equilibrium model	
relative frequency	
reproductive isolation	

Vocabulary Term	Definition (in your own words)
speciation	
sugar-phosphate backbone	
survival of the fittest	
theory	
vestigial organs
