

Six Kingdom Colour, Cut & Paste Instructions

1. Read the supplementary handout provided.
2. On the "Six Kingdom Classification System" chart (provided) colour-code each kingdom name with a different colour (you will need 6 colours).
3. On the "Kingdom Information" sheet, colour-code each fact to correspond with each kingdom colour.
4. Cut out all of the facts and paste them in the "Six Kingdom Classification System" chart, next to the appropriate kingdoms.
5. Under the "Cell Type" column of the "Six Kingdom Classification System" chart, indicate whether the cells of organisms in each kingdom are prokaryotic or eukaryotic.
