

# Volcano Group Assignment:

Your job:

You have been given a specific type of volcano to research. You are going to find the following information using your devices and become an expert on your type of volcano. You will then share your findings with the rest of the class.

You need to find:

1. Your type of volcano:
2. Where are they located generally (at divergent boundaries, hot spots, convergent boundaries)?
3. How are they formed? What is their structure? You will need to draw a simple labelled diagram on the board.
4. Name 3 famous volcanoes of your type and where they are in the world.
5. How often do they erupt? What is their eruption like (is it explosive, oozing, is there lots of lava, etc)
6. How damaging are they to the surrounding areas. Any notable eruptions?
